

Lightning Serial+Power Cable (L4-DB9PV)

Connects a Lightning iPhone, iPad or iPod touch to RS-232 serial devices and to a 5V power source.

The Serial+Power Cable includes an external 5v (20W) power adapter.

This cable is used in conjunction with the RscMgr SDK to create iOS apps that communicate with a serial device. It is licensed under the Made for iPod (MFI) program for enterprise, education and personal use. Under current Apple policy this cable may not be used with apps sold on the App Store.

Part #: L4-DB9PV
Price: \$115
